

Covid-19 Risk Assessment working in the office

Name of Locality office: SALIBURY HEAD OFFICE

Assessment carried out by: S Pitcairn

Date of assessment was carried out: 1st June 2020

Date of next review: Oct 2020 (or earlier if required)

Abicare Services Ltd is a Domiciliary Care Company providing Live-in Care and Daily Care to the elderly and vulnerable in the community. Most of our 270 employees are community workers, but we do have office-based support staff working either fulltime or part-time out of our five offices. The offices vary in size, where two operate as serviced offices with shared facilities, one operates as a separate office with their own kitchen, but shared toilets with other companies and two operate as completely individual units with no shared facilities with other companies.

There will be a separate risk assessment completed for each office (BOA, Swindon, Wales, Basingstoke).

The Salisbury office is an individual building over three levels

- Ground level – foyer with photocopier, kitchen, toilets, shower room and 4 individual offices
- Middle level – landing with photocopier and 7 individual offices
- Top level – landing with envelope machine, kitchen, toilets and 3 separate offices and one large training room.
- Car Parking - private outdoor car parking facilities and area to chain bikes

Covid-19 is a new illness that can affect your lungs and airways. It is caused by a virus called Coronavirus and symptoms can be mild, moderate, severe or fatal.

There are approximately 33 people work in the building on a normal day with 10 – 15 visiting their managers or to attend training. Since Covid-19 the staff have been working remotely at home, except for a core team of 5 people. The risk assessment is being put in place to allow more of the workforce to return, but in a safe manner due to the 'Stay Alert' and advice from the Government's booklet – 'Working safely during COVID-19 in offices and contact centres'.
